KEY ACHIEVEMENTS

SAP Management System

Developed a SAP-inspired management system, including stock, article, and order tracking modules, improving my skills in full-stack Java development and enterprise resource management.

Contributed to Beobank's Website Migration

Website Migration Participated in the migration using new tools from Crédit Mutuel and Euro Information, leading to a successful launch for February 2025.

Developed a Streaming Website

Created a streaming platform with cinema reservation features using PHP for the first time, mastering both backend and frontend development as well as database management for this project.

SKILLS

Hard Skills

HTML · CSS · JS · TypeScript · XML · PostgreSQL · Angular · React · Java · Jakarta EE · Spring · Hibernate · Docker · Scrum

Soft Skills

Teamwork · Adaptability · Autonomy · Proactive Learning · Communication

SUMMARY

As a passionate Full Stack Developer, I have a strong foundation in both front-end and back-end technologies, developed through hands-on projects and intensive training. With expertise in Java, Angular, and full-stack frameworks, I create efficient, scalable solutions. My experience in website migration and web app development shows my adaptability in dynamic environments. Always eager to learn, I'm excited to bring my technical skills and proactive mindset to your team.
